HPV Vaccinations

Providers are asked to collect all information relating to each dose of HPV Vaccine given and hold this information until the proposed HPV Register is operational. This information should then be forwarded to the register in a manner that will be advised by your Division. This will enable a complete population set of data to be available with relation to HPV and Cervical Cancer. All data that is lodged for Girls 12 to 18 years of age will attract a $6.00 incentive administrative fee for providers.

Consent must be obtained for both the procedure and the collection (and lodging) of the data for the register
